ELITE AUCTION PLATFORM

Official Guide: Player List Formats, Photo Uploads & Sponsor Branding

DOCUMENTATION VERSION 2.4 • OFFICIAL REFERENCE MANUAL

1. SUPPORTED SPREADSHEET FORMATS (PLAYERS LIST)

The application accepts standard spreadsheet formats and uses an automated column header normalizer to map player details into the database.

FORMAT	EXTENSION	RECOMMENDED USE & TECHNICAL SPECIFICATION
Excel Workbook	.xlsx	Standard Microsoft Excel workbook. Recommended format for all player imports.
Legacy Excel	.xls	Microsoft Excel 97–2003 Binary format. Fully backward-compatible.
CSV Delimited	.csv	Comma or semicolon delimited. Must be encoded in UTF-8 to preserve special characters.

Recognized Column Headers (Auto-Mapped & Case-Insensitive)

Headers in your spreadsheet can use any of the variations below. The parser matches them automatically regardless of capitalization or extra spacing.

FIELD	ACCEPTED COLUMN HEADER VARIATIONS	RULES & BEHAVIOR
Player Name *	Player Name, Name, Full Name, Player, Cricketer Name	Required. Player identifier across live console and logs.
Role / Skill	Role, Player Role, Playing Role, Category, Type, Skill	Normalized automatically to: Batsman, Bowler, All-Rounder, WK.
Base Price	Base Price, Price, Base Value, Bid, Start Price, Cost	Numbers only (e.g. 500, 1000). Defaults to tournament base bid if blank.
Form No / ID	Form No, Form Number, Form, Player ID, Sr No, Number	Crucial registration number. Used for bulk ZIP photo auto-matching.
Photo URL	Photo, Photo URL, Image URL, Image, Picture	Direct web link or Google Drive shareable file URL.
Bio Details	Age, Father Name, Tag Owner, Custom Tag, Spec 1/2/3, Size	Optional extended player profile info for spectator card & inspection.

SPREADSHEET PREPARATION TIP

Ensure Form No (or Player ID) is unique for each player. This allows the system to instantaneously map bulk photos uploaded via ZIP archive.

2. PLAYER PHOTOS UPLOAD METHODS

The platform supports three distinct methods for attaching photos to players:

METHOD	HOW TO USE	SUPPORTED FILE FORMATS
1. Spreadsheet Link	Paste image URL or Google Drive shareable link into the Photo column of your Excel/CSV.	Web image URLs or Google Drive links (viewable by anyone with link)
2. Bulk ZIP Upload	Upload a .zip file containing photos named by Form No or Name (e.g. 101.jpg, Rohit Sharma.png).	.zip archive containing: .jpg, .jpeg, .png, .webp, .svg
3. Admin Edit Panel	In Admin > Manage Players, click Edit on any individual player to upload a photo directly.	.jpg, .jpeg, .png, .webp (transparent PNG recommended)

3. UPCOMING AUCTIONS SCHEDULE & DATE FILTERING

Administrators and spectators can view scheduled auctions, filter tournaments by specific dates, and verify active live events:

- **Active Live Auction Badge:**
The active running tournament automatically displays an animated green LIVE NOW pill in spectator and big-screen displays.
- **Scheduled Tournament Cards:**
Shows upcoming tournaments with Date, Time, Base Bid, Total Purse, Sport Type, and Presenter Name.
- **Real-Time Date Picker Filter:**
Select any calendar date via the "FILTER BY DATE" input to immediately filter events occurring on that day, or click "ALL DATES" to restore the full schedule.

4. SEPARATE SPONSOR LOGO & OWNER BRANDING

A dedicated sponsor branding option is available on both the Admin and Superadmin sides, decoupled from auction parameters:

PANEL	LOCATION & ACTION	CAPABILITIES & ENDPOINT
Admin Console	Top bar gold button: [SPONSOR LOGO]	Dedicated modal with instant preview, file selector, Owner Name field, and Save / Remove buttons. (POST /admin/update-sponsor)
Superadmin Center	Top-level card: SEPARATE SPONSOR & OWNER BRANDING	Interactive card on /superadmin for 1-click branding updates without opening sub-menus. (POST /superadmin/update-sponsor)

Live Spectator Header & Zero-Overlap Navigation

- Sponsor Placement: The uploaded sponsor logo or owner name appears prominently under "PRESENTED BY" in the top bar across spectator and projector screens.
- Shifted Navigation Options: All spectator navigation tabs (LIVE BID, PLAYER LIST, TEAM VIEW, UPCOMING EVENTS) are positioned cleanly on the right side of the header. This completely eliminates overlap with the sponsor branding.
- Real-Time WebSocket Broadcast: Updates push live across all connected clients via dataUpdate—no spectator refresh required.

RECOMMENDED SPONSOR LOGO SPECIFICATIONS

Format: Transparent PNG (.png) or Vector SVG (.svg) for optimal display on dark dashboard themes. Recommended dimensions: 500 x 200 px (aspect ratio 2.5:1 to 3:1).

5. QUICK OPERATION SUMMARY

OPERATION	RECOMMENDED STEP-BY-STEP PROCEDURE
Import Players	Go to Admin > Import > Upload .xlsx file with columns: Name, Role, Base Price, Form No.
Bulk Import Photos	Upload .zip file with images named <FormNo>.jpg (e.g. 101.jpg) via Admin > Import.
Update Sponsor Logo	Click [SPONSOR LOGO] in Admin topbar or Superadmin card > Select Image > Save & Apply Live.
Spectator Views	Click LIVE BID for 3-column arena, PLAYER LIST for database, or TEAM VIEW for franchise rosters.
